Program 9:

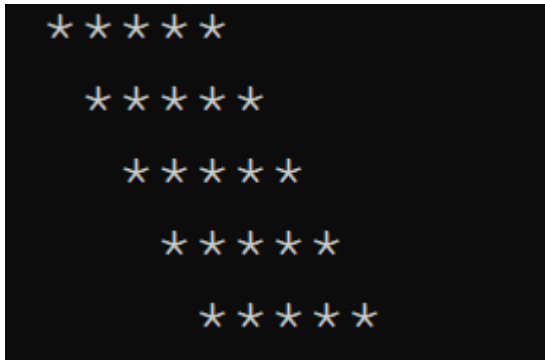

Write a java program to print the following output

```
class Demo
{
    public static void main(String[] args)
    {
        for(int j =1;j<=5;j++)
        {
            for(int k =5; k>=j;k--)
            {
                System.out.print(" ");
            }
            for(int i=1;i<=5;i++ )
            {
                System.out.print ("*");
            }
            System.out.println();
        }
    }
}
```

Program 10:

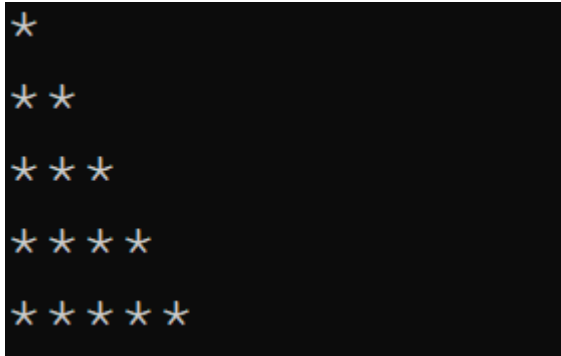

Write a java program to print the following output

```
class Demo
{
    public static void main(String[] args)
    {
        for(int j =1;j<=5;j++)
        {
            for(int k =1; k<=j;k++)
            {
                System.out.print(" ");
            }
            for(int i=1;i<=5;i++ )
            {
                System.out.print ("*");
            }
            System.out.println();
        }
    }
}
```

Program 11:

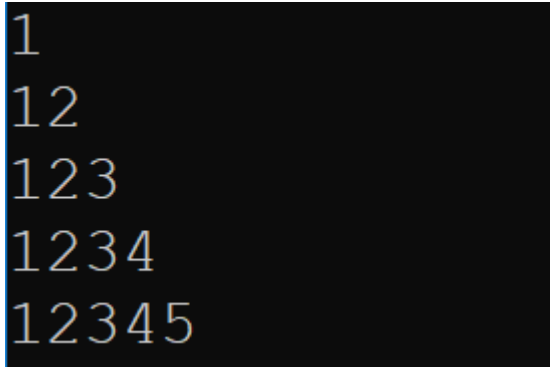

Write a java program to print the following output

```
class Demo
{
    public static void main(String[] args)
    {
        for(int j =1;j<=5;j++)
        {
            for(int i=1;i<=j;i++ )
            {
                System.out.print ("*");
            }
            System.out.println();
        }
    }
}
```

Program 12:

Write a java program to print the following output

```
class Demo
{
    public static void main(String[] args)
    {
        for(int j =1;j<=5;j++)
        {
            for(int i=1;i<=j;i++ )
            {
                System.out.print(i);
            }
            System.out.println();
        }
    }
}
```

Program 13:

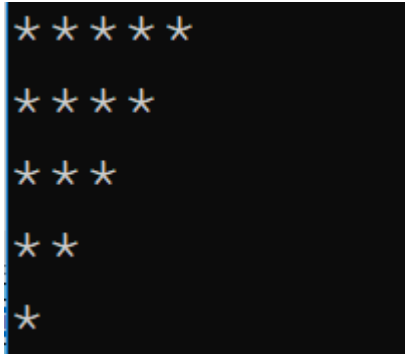

Write a java program to print the following output

```
1
22
333
4444
55555
```

```
class Demo
{
    public static void main(String[] args)
    {
        for(int j =1;j<=5;j++)
        {
            for(int i=1;i<=j;i++ )
            {
                System.out.print(j);
            }
            System.out.println();
        }
    }
}
```

Program 14:

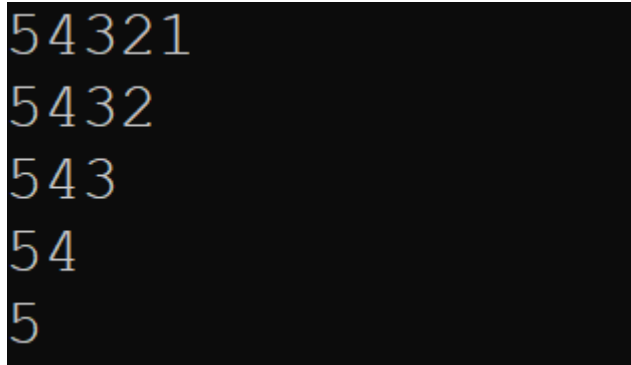

Write a java program to print the following output

```
class Demo
{
    public static void main(String[] args)
    {
        for(int j =1;j<=5;j++)
        {
            for(int i=5;i>=j;i-- )
            {
                System.out.print(i);
            }
            System.out.println();
        }
    }
}
```

Program 15:

Write a java program to print the following output

```
class Demo
{
    public static void main(String[] args)
    {
        for(int j =1;j<=5;j++)
        {

            for(int i=5;i>=j;i-- )
            {

                System.out.print(i);

            }

            System.out.println();

        }

    }
}
```

Program 16:

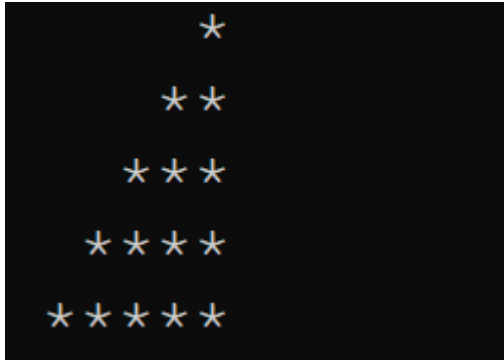

Write a java program to print the following output

```
class Demo
{
    public static void main(String[] args)
    {
        for(int j =1;j<=5;j++)
        {
            for(int i=5;i>=j;i-- )
            {
                System.out.print(j);
            }
            System.out.println();
        }
    }
}
```

Program 17:

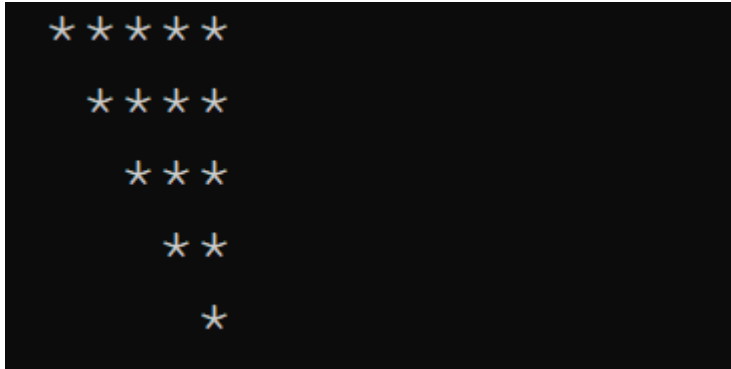

Write a java program to print the following output

```
class Demo
{
    public static void main(String[] args)
    {
        for(int j =1;j<=5;j++)
        {
            for(int k=5;k>=j;k-- )
            {
                System.out.print(" ");
            }
            for(int i=1;i<=j;i++ )
            {
                System.out.print("*");
            }
            System.out.println();
        }
    }
}
```

Program 18:

Write a java program to print the following output

class Demo

```
{  
  
    public static void main(String[] args)  
    {  
  
        for(int j =1;j<=5;j++)  
        {  
  
            for(int k=1;k<=j;k++ )  
            {  
  
                System.out.print(" ");  
  
            }  
  
            for(int i=5;i>=j;i-- )  
            {  
  
                System.out.print("*");  
  
            }  
  
            System.out.println();  
  
        }  
  
    }  
}
```
