The conditions to select students who will be awarded scholarship as part of the Bright Youth Scholarship program are as follows. The applicant must

Be a citizen of United States.

Be enrolled in a full- time master's program in psychology.

Have completed her/his bachelor's degree with a score of at least 65%

Not be more than 30 years of age.

Not be in receipt of any other scholarship benefit it for the current academic year.

However, if an applicant

Fulfils all other conditions except (1) but is a Green Card holder, when should be referred to the Director, Selection Committee.

Fulfils all other conditions expect(2) but is enrolled in a part time master's program in psychology and has at least two years of professional work experience in the field of psychology. She/he should be referred to the Assistant Director, Selection Committee.

(**The last date to apply for the scholarship is April 30, 2018)**

A decision has to be taken on the basis on the given conditions. There are two cases based on the same set of conditions. Take a decision for both the cases and mark the correct answer for each.

Oliver is a citizen of the United States. He is 27 years of age. He completed his bachelor's degree in psychology on August 19, 2014 and worked there till January 31, 2018. He has now enrolled for a part-time master's program in psychology at a private university. He has not applied for any their scholarship for this academic year. Should the scholarship be awarded to the student?

OPTIONS

The scholarship should be awarded for the applicant.

The applicant should be referred to the Assistant Director Selection Committee.

The applicant should be referred to the assistant director selection committee.

Insufficient data.

For some animals, hunkering down in a cozy den during the cold winter months, when nights are long and temperatures are low, isn't just a matter of momentary comfort – it's essential for survival. Hibernation is when animals rest or stay asleep during the entire winter, while migration is the movement of animals from one place to another. The key reason that makes an animal hibernate or migrate is the lack of food, which occurs during the winter months due to the cold weather.

Hibernation is of different types. Some animals sleep deeply, while some of them are light sleepers. During the fall, animals start preparing for winter. They eat extra food and begin storing it as body fat. Their bodies utilize this fat for energy while hibernating. Some animals store food like nuts and acorns to eat later in the winter. During hibernation an animal's body temperature drops, heartbeat slows down, and it uses very little energy. If temperatures turn warm during the winter, the animals end up using more energy. wake up early, and then have no food to eat.

The places where the animals hibernate in the winter include dens, burrows. hollow logs. or in the openings between rocks. Animals also migrate to other areas during the winter months. Many birds fly long distances to escape the cold winter. Animals may also migrate to find a good habitat to raise their young. They use the sun as a compass when they fly during the day. others modify their path of travel so that it remains unaffected by the sun's movement. During the night time, some birds may use the stars to help them migrate. Birds and other animals such as sea turtles can detect north and south because they are able to feel the earth's magnetism. Storms, bad weather, pollution. and skyscrapers may also affect the birds during migration.

Similar to the hibernating animals, migrators prepare ahead of time. Some birds eat a lot and double their weight to fuel their regular feather shedding and growth. In short, there are numerous animals that hibernate or migrate during the winter months. The differences in their behavior may vary widely, but all have the same reason, to find food and survive the winter months.

Questions:

What is the meaning of the word "hunkering in the context of the passage?
Descending
Crashing
Pouncing
Crouching

How do sea turtles detect north and south?

                 By using sun as a compass
                 By feeling the earth's magnetic fields
                 By observing the birds that are migrating
                 By using stars as a compass

What do animals do to prepare themselves for hibernation?

                 Eat extra food
                 Find a new habitat with surplus food
                 Find a warner location
                 All of the above

What according to the passage could have an effect on the birds during migration?

                 The source of water available in the path of migration
                 Presence of predators in the path of migration
                 The quality of air
                 Presence of birds of the same species

The conditions to select an essay to be judged in a state level essay competition are as follows. The participant must
be a regular student in grade 11 or 12 at any public or private school:
have written the essay in minimum 700 and a maximum of 1,000 words;
have listed the name of the reviewer who has reviewed the essay before the final submission. The reviewer must be a teacher who teaches at the same school as the essay participant;
have submitted the essay online at least four days prior to the competition.

However, if a participant
fulfils all other conditions except (1) but is under the age of 20 and is enrolled in a high school correspondence program at a public school. s/he should be referred to the Controller, Selection Committee:

fulfils all other conditions except (3) but has listed the name of a parent or private tutor who has reviewed the essay in absence of a reviewer, s/he would be referred to the Assistant Director, Selection Committee.
(The competition is on November 18, 2018)

Mathew is a full-time student in grade 11 at a public school. He wrote an 800-word essay and submitted it online on November 5, 2018. Due to paucity of time his history teacher could not review his essay. His mother, who is a history graduate, reviewed the essay and so he mentioned his mother as the reviewer. Should the essay be selected?

                 The essay should be selected.
                 The participant should be referred to the Controller, Selection Committee.
                 The participant should be referred to the Assistant Director, Selection Committee.
                 The essay should not be selected.
                 Insufficient data.

Jessica was born on January 10, 1999. She is pursuing her high school through a correspondence program with a public school. She wrote a 1000-word essay and mentioned her science teacher as the reviewer. She submitted her essay online on November 01. 2018. Should the essay be selected?

The essay should be selected.
 The participant should be referred to the Controller, Selection Committee.
 The participant should be referred to the Assistant Director, Selection Committee.
 The essay should not be selected.
Insufficient data.

Of all the fitness and wellness activities in India, Artisitic yoga is the new kind in town. It has successfully earned a pat on the back from whosoever has lent an ear to the latest advancements.Artistic yoga combines the suaveness of yoga and frenzy of modern cardio vascular exercises.The technique involves performance of various aasanas and pranayams followed by walking on treadmill, stair climbing, cycling and so on. The activities are performed in a cyclic order and the aasana or pranayam that is done in the beginning is repeated in the end. This helps an individual at the physical level as well as mental and spiritual level, thus helping bring about a complete transformation of body, mind and soul.
 Artistic   yoga   helps   in   the   overall   development   of   those   who   practice   it
B. Artistic yoga has been adopted by modern people since it is in fashion these days
C. All the activities performed at the beginning of artistic yoga are also repeated in the end
D. Since it combines yoga and exercises, artistic yoga will replace other fitness and wellness programs

4) Xtreme Sports and Fitness Club has launched "High-Intensity Workout" sessions for its members. The conditions to register for these sessions are as follows. The member must
be at least 18 years of age;
have paid any outstanding payment to the club authorities before April 10, 2018;
have submitted a physical fitness certificate along with the enrolment form;
have attended at least 60 hours of low-intensity workout sessions at the Xtreme Sports and Fitness Club after January 1, 2018, but before April 20, 2018.

However, if a member
fulfils all other conditions except (2) but pays the dues along with a fine of $60 at least by April 15, 2018, s/he should be referred to the Treasurer, Club Council;
fulfils all other conditions except (3) but can submit the same at least by April 25, 2018, s/he should be referred to the President, Club Council.
(the last date of registration is April 20,2018)

1) Luke is 28 years of age. He joined the Xtreme Sports and Fitness club on January 15. 2018 and has attended 75 hours of low-intensity workout sessions since then. He has not yet received his physical fitness certificate as he is recuperating from a mild muscle strain. He can submit the same by April 22, 2018. His membership fee for the month of March was due and he paid the same on April 10, 2018. Should the member be registered for the high-intensity workout sessions?
                    The member should be registered.
                    The member should be referred to the President, Club Council.
                    The member should be referred to the Treasurer, Club Council.
                    The member should not be registered.
                    Insufficient data
2) Mel is 25 years of age. She joined the Xtreme Sports and Fitness Club on February 28, 2018 and has attended 20 hours of low-intensity workout sessions so far. Prior to this, she has attended 90 hours of low-intensity workout sessions at the Prestige Fitness Club. She has submitted a physical fitness certificate

along with the enrolment form. She does not have due payment. Should the member be registered for the high-intensity workout sessions?

The member should be registered.
The member should be referred to the President, Club Council.
The member should be referred to the Treasurer, Club Council.
The member should not be registered.

1)

SuxushiPvt. Company is looking for a laptop company to buy 5000 laptops. The criteria basis for selection includes –

The company should provide a guarantee of minimum3 years.
Laptops should have 3 important features - Dual core processor. battery back up of minimum 3 hours and a screen size of 14 inches
The price of a laptop should not be more than 30.000 rupees.
The company should have a experience of ten years or more in IT field.
The company should not have any legal case pending against them

However, if the firm satisfies all of the above criteria except:
criteria (2) but provides any of the above two features then his/her case may be referred to the Director.
criteria (3) but provides an auxiliary voucher of a laptop bag, then his/her case may be referred to the Finance manager.
criteria (4) but has a experience of minimum five years then his/her case is referred to the chairman of the company.

(All cases stand on 25th April 2012)

1)

Vio Group is best known for its laser sensor laptops which have a dual core processor, tour hour battery back up, vision detector sensor and a 14 inch screen. The price of the laptop is Rs. 33,000 The company has no history of any legal cases ever since its inception in 1999. It provides a guarantee of four years and a laptop bag to its customers.

i)Suxushi will buy the laptops
ii)Suxushi will not buy the laptops
iii)The case will be referred to the Director
iv)The case will be referred to the Chairman
v)The case will be referred to the Finance Manager

2)

Hallardpackwell laptop company was established on 26th November 1997. Hallard laptops have a dual core processor and a battery back up of four hours. In 1999, Hallard were accused of copying an Intium feature, which was over ruled by a U.S. court in 2006. The laptops costs 28,000 rupees and provides a guarantee of four years.

i)Suxushi will buy the laptops
ii)Suxushi will not buy the laptops
iii)The case will be referred to the Director
iv)The case will be referred to the Chairman
v)The case will be referred to the Finance Manager

2)

There are 2 questions based on the same data. Answer the questions based on the given information:

The following are the conditions for selecting a "Management trainee for a reputed company. The candidate must:

Be a post graduate in commerce with atleast 60% marks or a CA.
Not be more than 25 years old and less than 20 years old as on 1.12.2009.
Have fluency in English and Hindi.
Be in a position to pay Rs.10000 as deposit to the company.
5.Give an undertaking to work for atleast 5 years for the company.

However,
a.)If the candidate fulfills all conditions except (1.) then he/she should be referred to the Managing Director of the Company.
b.)If the candidate fulfills all the conditions except (4.) then he/she should be referred to the chairman of the Company.
Should the given candidate be selected? (The case is presented as on 1.12.2009)

1)
Rajan is a post graduate in Commerce with 70% marks. He is fluent in English and Hindi. He is willing to take the 5 year undertaking and is also ready to pay the required deposit. His date of birth is 01.11.1989.
i)Insufficient Data
ii)Candidate should not be selected
iii)Candidate should be selected
iv)Candidate is to be referred to the Managing Director
v)Candidate is to be referred to the Chairman

2)
23 year old Suresh is a CA with fluency in Hindi and English. He can pay Rs.8000 as deposit and will give five years undertaking.
i)Insufficient Data
ii)Candidate should not be selected
iii)Candidate should be selected
iv)Candidate is to be referred to the Managing Director
v)Candidate is to be referred to the Chairman

3)
Consider the situation where two or more people are gathered such as a wedding reception, a job interview or even two off-duty cops hanging out in a mall. What is the common link between these situations? Almost all of them involve people trying to talk to each other. But in these very moments where a conversation would enhance an encounter, we often fall short. We can't think of a thing to say. Or worse, we do a passable job at talking. We stagger through our romantic, professional and social worlds with the goal merely of not crashing, never considering that we might soar.

Not every single conversation that you have is going to be in-depth and serious. And that's completely fine! You should relax. Eventually, while you're sitting there talking small talk, something's going to pique your interest, or something's going to catch their interest. And someone's going to ask a question, and its going to lead you further deeper into the subject matter. So it will happen if there's something there to talk about. Otherwise, be on your way and let it go. By the time that you're thirsty, you're already

dehydrated. So by the time you've reached an awkward silence. something's already gone wrong. But it's never too late to bring the conversation back in! Very often, an awkward silence comes because either you weren't listening or they weren't listening, and therefore, you guys have kind of meandered off-topic to where you're at the opposite ends of a football field.

One way to get beyond small talk is to ask open-ended questions. Aim for questions that invite people to tell stories, rather than give bland, one-word answers. When small talk stalls out, it's often due to a phenomenon we call "mirroring." Mirroring happens when we subconsciously smile or frown along with the speaker, as well as imitate body posture or attitude about the topic. In our attempts to be polite, we often answer people's questions directly, repeat their observations, or just plainly agree with whatever they say. A way to break the boring-conversation mirror is to skip over the expected response and go somewhere next-level. For example. if someone asks you, "How was your flight? You can always reply it withI'd be more intrigued by an airline where your ticket price was based on your body weight and IQ", instead of the same old response.

1)
According to the passage, what is the conversation mirror?
> i)When both the participants are not interested in the conversation but continue to talk
> ii) When a person subconsciously imitates the speaker
> iii) When the conversation is of interest to both the participants
> iv) When a speaker subconsciously wanders off a conversation

2)
What has the author suggested to do, in order to go beyond small talk?
> Ask open-ended questions
> Start imitating the speaker
> Start going off-topic
> Pause the conversation for a short time

3)
What does the author mean by "By the time that you're thirsty, you're already dehydrated?"
> He means that by the time you get to know about the fault, the damage has already been done.
> ii)He means that awkward silence in a conversation comes because people go off-topic.
> iii)He means that sometimes it is not possible to solve a problem.
> iv)He means that it's never too late to renew a conversation.

4)
What is the meaning of the word "meandered" in context of the passage?
> Picked
> Suggested
> Drifted
> Spoken

4)
The conditions to get 100% refund on cancellation of air tickets booked with FlyFair airlines are as follows. The customer must
> have booked the ticket at least seven days before the scheduled departure;

have applied for ticket cancellation at least 48 hours before the scheduled departure;

have purchased a refundable ticket.

However, if a customer

fulfils all other conditions except (1), 40% of the total fare should be refunded. else no refund should be given;

fulfils all other conditions except (2) but has applied for ticket cancellation at least 24 hours before the scheduled departure, 20% of the total fare should be refunded, else no refund should be given;

fulfils all other conditions except (3), no refund should be given;

does not fulfil two or more of the conditions stated above, no refund should be given.

(The ticket cancellation request is presented at 6 PM on June 27, 2017.)

1)
Susan booked a refundable air ticket on June 15, 2017. Her flight is scheduled to depart from New York on June 28, 2017 at 6 PM. She wants to cancel the ticket as she needs to attend an urgent client meeting. How much refund should the customer get?

    i)The customer should get 100% refund.
    ii)The customer should get 40% refund.
    iii)The customer should get 20% refund.
    iv)The customer should not get any refund.
    v)Insufficient data

2)
Zen booked a refundable air ticket on June 25,2017. His flight is scheduled to depart from Dallas airport at 10 PM on July 15, 2017. He wants to cancel the ticket because of change in his travel plans. How much refund should the customer get?

    i)The customer should get 100% refund.
    ii)The customer should get 40% refund.
    iii)The customer should get 20% refund.
    iv)The customer should not get any refund.
    v)Insufficient data

5)
The conditions to shortlist a candidate for an interview for the job role of a sales manager in a pharmaceutical company are as follows.
The candidate must

    hold a Bachelor's degree in science with a score of at least 60%;
    be a high school graduate with a score of at least 70%;
    not be more than 2S years of age as of January 1, 2015;
    have worked as a sales executive for at least 1 year in the pharmaceutical industry;

possess a valid driver's license.

    a). However, in case of a candidate who
    b). fulfills all other conditions except (1) but has a Bachelor's degree in commerce with a score of at least 65%, s/he should be waitlisted for the interview;

b. fulfills all other conditions except (4) but has at least 6 months of work experience as a sales executive in the healthcare sector, s./he should be referred to the Senior Manager, Sales;

c. fulfils all other conditiond except (5) but has applied for one s/he shpuld be referred to the Manager, Human Resource Development (HRD)

(The case is presented on January 30, 2015.)

1)

David was born on July 12, 1991. He scored 72% in his high school examinations. He completed his Bachelor's degree in commerce with a score of 67%. He has a driving license that expires on July 23, 2015. He worked with Medicines Pvt. Ltd. as a pharmaceutical sales executive from November, 2013 to December, 2014. Should the given candidate be shortlisted for the interview?

    i)The candidate should be shortlisted for the interview

    ii)The candidate should be waitlisted for the interview

    iii)The candidate should be referred to the Senior Manager, Sales.

    iv)The candidate should be referred to the Manager, HRD

    Insufficient data

2)

Sonya holds a Bachelor's degree in Science (Zoology) where she scored an aggregate of 85%. She secured a score of 70% in her high school examinations. She was born on April 30,1992. She has a work experience of 1.5 years as a sales executive in a company that sells muscle pain-relief ointments. She has a driver's license that expires on February 15, 2015. She has already applied for renewal of the same. Should the given candidate be shortlisted for the interview?

    i)The candidate should be shortlisted for the interview

    ii)The candidate should be waitlisted for the interview

    iii)The candidate should be referred to the Senior Manager, Sales.

    iv)The candidate should be referred to the Manager, HRD

    Insufficient data

6)

ShopEx.com charges a shipping fee of $30 to deliver products to Location Y. However, a customer can get free shipping to Location Y if s/he meets the following criteria. The customer must

    a) have a gold membership of the e-store. The gold membership is valid for a period of one year from the date of subscription or last renewal;

    have opted for delivery in 4-8 business days of placing the order;

    have ordered products worth at least $200.

    However, if a customer

    fulfils all other conditions except (2) but has opted for delivery in 1-3 business days, s/he should be charged a shipping fee of $20;

    fulfils all other conditions except (3) but has ordered ONLY baby care products worth at least $150, s/he should be charged a shipping fee of $15;

    (This order is placed on February 01, 2018.)

1)

Steve has ordered products worth $220 on ShopEx.com and has opted for delivery in 1-3 business days. He does not have a gold membership of the

    e-store but intends to subscribe to it soon. Should the order be shipped for free to this customer?

    i)The order should be shipped for free.

    ii)A shipping fee of $30 should be charged.

iii)A shipping fee of $20 should be charged.
iv)A shipping fee of $15 should be charged.
v)Insufficient data

2)
Sophie subscribed to the gold membership of ShopEx.com on November 22, 2017. She has now ordered baby products worth $220 and has opted for delivery in 4-8 business days. Should the order be shipped for free to this customer?

i)The order should be shipped for free.
ii)A shipping fee of $30 should be charged.
iii)A shipping fee of $20 should be charged.
iv)A shipping fee of $15 should be charged.
v)Insufficient data

7)
The conditions to shortlist candidates for the position of a private security officer are as follows. The applicant must

not be more than 30 years of age;
be a high school graduate;
have cleared the pre-employment entrance test with a score of at least 70%;
have cleared the pre-employment screening process;

However, if an applicant

fulfils all other conditions except (2) but commits to complete the high school diploma within six months of hire, s/he should be referred to the Manager, Human Resources;

fulfils all other conditions except (3) but scored at least 65% in the pre-employment entrance test and is trained in any form of self-defense, s/he should be referred to the Senior Manager, Security Operations;

fulfils all other conditions except (5) but has applied for one, s/he should be referred to the Assistant Manager, Recruitment

(This case is presented on August 30, 2018)

1)
Mike was born on May 15,1986. He dropped his high-school examination to join a school that taught various fighting techniques. He is now a trained fighter and teaches self-defense techniques at a school. He has cleared the pre-employment entrance test with a score of 80% and has also passed the pre-employment screening process. He has committed to complete his high school diploma within six months of hiring. His driving license expires on February 28, 2025. Should the applicant be selected?

i)The applicant should be selected.
ii)The applicant should be referred to the Senior Manager, Security Operations.
iii)The applicant should be referred to the Assistant Manager, Recruitment.
iv)The applicant should not be selected.
v)Invalid data

2)
Tim was born on January 01,1995. He completed his high school last year with a score of 65%. He cleared his driving test last month and hopes to receive his driving license in a fortnight. He has scored 75% in the pre-employment entrance test and has also cleared the pre-employment screening test conducted by the regulatory agency. Should the applicant be selected?

i)The applicant should be selected.

ii)The applicant should be referred to the Senior Manager, Security Operations.
iii)The applicant should be referred to the Assistant Manager, Recruitment.
iv)The applicant should not be selected.
v)Invalid data

8)

The world production of sugar has been reported to be very scarce as compared to the global sales for four years. The demand for sugar is extremely high but the supply has been low for quite some time now. This could be because of the awful weather and also because some chief sugar growers have switched to high-priced jute. The price of sugar has soared in response to the phenomena of the demand supply disparity. The price of sugar now equals that of jute.

i)Sugar production is profitable only when the price of sugar is as high as that of jute.
ii)The sugar growers who had shifted to the higher priced jute. will now move back to producing sugar.
iii)Demand for jute was higher than the demand for sugar. which made sugar growers shift their production.
iv)If there continues to be a shortfall in the production of sugar. the price of sugar may even exceed that of jute.

9)

Albert Einstein was a German scientist who came up with many discoveries and theories. The Theory of Relativity was his most important contribution to the world of science. This theory holds that measurements of space and time differ based on different conditions. The formula he developed explains how energy is related to mass. This theory changed how scientists looked at the world and led to many modern inventions, including nuclear energy and the nuclear bomb.

Einstein was born in Ulm, Germany in March, 1879, but lived most of his childhood in the city of Munich. He had speech problems as a child, and his parents didn't think he was very intelligent. He didn't talk until he was four years old and didn't read until he was nine. He said that he wasn't enamored with school but loved reading and learning on his own. Even when he was an adult, he was quite disorganized and forgot appointments. His father owned an electronics shop. so Albert learned all about science and electronics from him. He first became interested in science when his father gave him a compass.

Albert Einstein laid much of the foundation for modern physics. He came up with the concept that light is made up of particles called photons. Most scientists then didn't agree, but later experiments in 1919 proved him right. He was awarded the Nobel Prize for Physics in 1921. Together with another scientist, Satyendra Bose, Einstein discovered another state of matter- the Bose-Einstein condensate. in addition to solid, liquid and gas. Today this discovery is used in lasers and superconductors. Einstein did not work directly on inventing the atomic bomb, but his name is closely associated with the bomb. This is because his scientific work and discoveries contributed majorly to the bomb's development. He received a love of music from his mother and said that if he were not a physicist, he would have been a musician. He loved to play the violin and piano and said that he felt great joy in doing that.

Albert Einstein is considered the greatest scientist of all time. His brain has been preserved by scientists so that they can examine it and find out why he was such a genius. It is said to be different from the brains of most other people.

1)
What can be inferred from the passage?

i)Satyendra Bose contributed more in the discovery of the Bose-Einstein condensate.
ii) Einstein's father played a major role in introducing him to the world of science.
iii)Most of the scientists did not approve of Einstein because he was disorganized and forgot appointments.
iv)Einstein's discoveries and theories were mostly used for destructive purposes.

2)
What problem followed Einstein even to his adulthood?
i)His inability to write
ii)His inability to play the violin
iii)His inability to read
iv)His tendency to stay disorganized and forget things

3)
What is the meaning of the word "enamored" in context of the passage?
i)Obsessed
ii)Finished
iii)Pleased
iv)Familiarized

10)
The conditions for allotment of on-campus dormitories to high school graduates who are seeking admission into a university are as follows.
The student's permanent residence should be at a distance of 25 miles or more from the university campus;
The student should submit a Character and Fitness Certificate provided by the high school;
The student should be willing to pay a non-refundable housing deposit of $400 to the University Housing Office;
A student who has secured at least a grade of 'B' in the final year of the high school should be allotted a single occupancy room. All candidates who have scored a grade below 'B' but above 'F', should be allotted a double occupancy room. Typical grades (from highest to lowest) are A, B, C, D, and F, where F stands for 'Fail'.

However, in case of a student who
fulfills all other criteria except (2) but can submit it within 7 days from the starting date of allotment, s/he should be referred to theSecretary, Student Welfare Board;

fulfills all other criteria except (4) but scored a grade above 'F' and has co-curricular achievements, s/he should be allotted a single occupancy room.

(The starting date of allotment is January 15, 2018.)

1)
Nancy scored a grade of 'B' in her final year of high school. She did not face any disciplinary charges in high school and also has a character and fitness certificate from the concerned high school authority. She is willing to pay a non-refundable housing deposit of $400 to the University Housing Office. She has won

many Lawn Tennis events and has participated in various competitions in the high school. She resides in the outskirts of the city where her campus is located. Should the student be allotted an accommodation?

    i)The student should be allotted a single occupancy room
    ii)The student should be allotted a double occupancy room
    iii)The student should be referred to the Secretary, Student Welfare Board
    iv)The student should NOT be allotted a dormitory
    v)Insufficient data

2)
Katie's permanent residence is 40 miles away from the university campus. She scored a grade of 'C' in her final year of high school. She faced a disciplinary charge a year back in her high school but can submit a character and fitness certificate that shows that she had improved over a period of one year. She doesn't have the certificate currently but can submit it by January 17, 2018. She is willing to pay the required non-refundable security deposit to the University Housing Office. Should the student be allotted an accommodation?

    i)The student should be allotted a single occupancy room
    ii)The student should be allotted a double occupancy room
    iii)The student should be referred to the Secretary, Student Welfare Board
    iv)The student should NOT be allotted a dormitory
    v)Insufficient data

What makes a classical dance different from a folk dance? A classical art evolves over a long period of time. It is not created overnight. Its technique is structured and stylized, predetermined and codified, and its projection conforms to a particular pattern. Emotion is not impulsive but is ruled by the intellect. The technique can only be imbibed through instruction. It has also stood the test of time.

It is dance that stems from the inspiration and the work of the individual rather than the collective. It is dance that not only affords appeal to the senses but also stimulates the intelligence of the performer and spectator alike.

On the other hand, folk dances express the mood of the moment, the celebration of a harvest or a festival. It is usually a group effort and often the performers can incubate the technique in less time and it is comparatively simpler. Folk dances all over the world have become more sophisticated, more structured and more complicated with elaborate group choreography, but its projection is spontaneous and safely dedicated or driven by literary instruction like, classical dance.

Classical dance in india is particularly characterized by an oral tradition of instruction from the guru or teacher to the sishya or disciple known as guru sishya

A popular dance from the Bollywood dance or film dance which is an amalgam of classical, folk, popular dance, western movement etc.

1)
According to the passage, what is the one characteristic that differentiates Bollywood dance from Classical dance?

    i)Evolution
    ii)Difficulty
    iii)Long-lasting
    iv)Appeal

2)

Why is Bollywood dance form known as an 'amalgam' of dances?

    i)It includes various dances, yet primarily focuses on one dance.

    ii)It has elements of various types of dances from all oner the world

    iii)It is a mixture of two dance forms with elements taken from each dance

    iv)The technique of Bollywood dance originates from classical and folk dance

3)

What has been highlighted as a key characteristic of the classical art form?

    i)More complicated than other dance forms and takes years to master

    ii)Handed down from master to disciple over many centuries.

    iii)Requires literary instruction unlike other dance forms.

    iv)Is ruled more by intellect than emotion

4)

What can be inferred as a reason of folk dances coming into existence?

    i)Since classical art forms were too complicated for the ordinary person to appreciate and enjoy

    ii)As a means of expression of happiness for occasions on a local community level

    iii)Since classical dances are more complicated to master, folk dances evolved as a means of self-expression

    iv)Classical dances are mostly solo performances and folk dances evolved as a means of celebration in a group

Two neighbours were engrossed in a serious discussion. One exclaimed how he found surveying animals to be pain, while the other claimed hoe he could see objects in space billions of light years away. This banter among friends Steven Longmore, the astronomer, and Serge Wich, the ecologist led to an unusual partnership to adopt tools originally developed to detect stars in the sky to monitor animals on the ground. They developed a system of drones and special cameras that can record rare and endangered species on the ground, day or night.

Keeping track of elusive animals, especially those that are endangered. Isn't an easy task. First, it takes time and money to conduct manual counts on the ground or to shoot photos from planes in the sky. Even though with video, cheaper drones and software, identifying animals has become more efficient, however, cameras made for daytight can miss animals or poachers moving through the forest. The devices don't work at night. This is where infrared cameras come into play. What do animals and stars have in common? They both emit heat. And much like stars, every species has a recognizable thermal footprint. They look like really bright, shining objects in the infrared footage. In this way, the software used to look for stars and galaxies in space can be used to seek out thermal footprints and the animals that produce them. To create a reference library of different animals in various environment the team is involving with a park and zoo to film and photograph animals. With these thermal images, they'll be able to better set up their equipment to identify target species in ecosystems around the world.

1)

What is the meaning of the word "elusive" in context of the passage?

    Difficult to catch

    Dangerous

    Lost

    Exotic

In 2001, New York City was hit with a $14,000,000 judgment because a subway train didn't stop in time, to avoid hitting someone, who was lying on the tracks, apparently trying to commit suicide. That is just the kind of shocking verdict that people dedicated to reforming the U.S. legal system, have been talking about for years. Irrational verdicts are merely the beginning of the problem, though.

The fear of possible lawsuits has actually changed the culture of America. Talk to teachers. Keeping discipline is hard when students can threaten that any decision might violate their presumed rights. Visit a playground and look for a seesaw. They are rapidly disappearing, going the way of merry-go-rounds, diving boards, and other joys of childhood. No court ever held that seesaws are too dangerous, but who will protect the school board if one youngster gets off too soon and the other child breaks an ankle?

This sue-for-anything philosophy was created on me 1960s. When judges and legislators woke up to abuses of racism and other discrimination that had gone unchecked for centuries. When the bad values of judges and legislators were finally exposed, they decided to create a neutral system in which no one in authority would assert any values. Give people the right to sue for anything, they thought and then they can't blame us for imposing bad values. Pretty soon, every angry person or clever lawyer learaned how to demand new "rights", but these new rights ended up taking away others rights.

Trial lawyers justify ruinous claims like a $78,000,000 verdict in Arkansas against a nursing home for the neglect of a 93 years old resident on the basis that it will teach the defendant a lesson not to do it next time. The money, though, comes from you and me, through rapidly rising costs and health insurance premiums. The most important accountability, which the trail lawyers never propose, is to remove the licenses of inept doctors or nursing homes so that they can't hurt someone else. Trial lawyers, of course, don't make such money if the focus is on better health care, rather than huge verdicts. A society needs red lights and green lights. The legal system is badly broken. Yet, few efforts at reform have gotten very far.

1)
Why are school authorities removing swings from playgrounds?
                  Children are scared to play and hurt themselves
                  ii) Strong likelihood of lawsuit in case a child in injured
                  iii) Lack of responsibility on behalf of teachers has led to this move
                  To adhere to the law passed for protection of children
2)
What can be a suitable title for the passage?
                  Positive outcome of law in America
                  ii) Misuse of law has shaken faith of Americans
                  iii) Unlawful practice of lawsuits
                  Society suffers with the ever-changing legal system
3)
Which of the given statement holds true for the neutral system?
                  Acts of discrimination were severely punished
                  ii) Defendants were responsible for poor functioning of the system
                  iii) Right to sue for anything was provided to people
                  iv)Authorities were denied the power to give verdicts
4)
Why are adequate reforms not being taken by lawyers?
                  They care about bringing justice in the existing legal system
                  ii) Introductionof reforms will result in irrational verdicts
                  iii) Laws in the legal system cannot be modified or changed
                  iv) Earnings of lawyers will suffer to a great extent

1)

The conditions for selecting players for a tennis training squad are as follows. The player must
be a member of a club affiliated to the National Tennis Authority;

        have played both the Tennis Junior (Closed) and Tennis Junior (Open) tournament in the past 12 months;

        have paid any outstanding debt to the National Tennis Authority in full by March 31, 2018;

        have a medical certificate stating that the player is medically fit for the training.

However, in case of a player who

        fulfills all other conditions except (2) but has won any of the Tennis Junior tournament (Closed or Open) in the past 12 months, s/he should be referred to the Assistant Coach, Training and Development.

        fulfills all other conditions except (3) but pays the debt along with a fine of $50 at least by April 15, 2018, s/he should be referred to the Manager, Training and Development.

1)

Roger is a member of the PSL Tennis Club that is affiliated to the National Tennis Authority. He paid the entire pending fees to the National Tennis Authority on March 25, 2018. He played the Tennis Junior (Closed) tournament two months back and won it. He underwent a medical fitness test three days back and was declared medically fit. He has a certificate for the same. He couldn't participate in the Tennis Junior (Open) tournament that was held on January 19, 2018. Should the person be selected?

        i)The player must be selected for the tennis training squad

        ii)The player must be referred to the Assistant Coach, Training and Development

        iii)The player must be referred to the Manager, Training and Development

        iv)The player must NOT be selected for the tennis

        v)Invalid data

2)

Nikki is a full paid-up member of a club affiliated to the National Tennis Authority. She participated in the Tennis Junior (Closed) and Tennis Junior (Open) tournaments in 2018. However, she injured her ankle during the Tennis Junior (Open) tournament and has not received her medical fitness certificate. She doesn't have any outstanding debt toward the National Tennis Authority. Should the person be selected?

        i)The player must be selected for the tennis training squad

        ii)The player must be referred to the Assistant Coach, Training and Development

        iii)The player must be referred to the Manager, Training and Development

        iv)The player must NOT be selected for the tennis

        v)Invalid data

2)

People might know about Marie Curie for her work in radiation, but only a few might be aware that she was also a friend of Albert Einstein. Marie Curie was born in Warsaw, Poland on November 7, 1867,

where she grew up with her parents and four other children in the family. She learned how to read and write at a very young age. She loved to learn and had always known she wanted to be a scientist.

In 1894, she married Pierre Curie. Marriage and motherhood did not stop Marie from her work and research as a scientist. She became interested in x-rays which were recently discovered. During World War I, she helped equip the ambulances with x-ray equipment, which she herself drove to the front lines of the battlefield. Her husband, Pierre, joined Marie in her experiments. At a time when women were oppressed, she took the plunge regardless of what other people had to say. She was often ridiculed for taking credit for her husband's work. But that never bothered the Curies. They went about their day, engrossed in what they had set out to do. Theyended up discovering two new elements.

Marie named one of the elements polonium after her home country, Poland, and the other she named it radium because it gave off so many strong rays. Marie and Pierre Curie came up with the new term 'radioactivity' too, used to describe emissions from radioactive substances. In 1903, the Nobel Prize in Physics was awarded to both scientists for their work in radiation, and Marie was also the first woman in history to be awarded the Nobel Prize. She did not stop there though, because in 1911 Marie won another Nobel Prize, this time in chemistry, for discovering the two elements, polonium, and radium. She was not only the first woman but also the first person ever to be bestowed with two Nobel Prizes. This made her very famous and scientists all over the world wanted to study radioactivity with her.

1)
How did Curie help during World War 1?
        i)By discovering radium
        ii)By helping in women emancipation and empowerment
        iii)By teaching the armed forces about radioactivity
        iv)By equipping the ambulances with the x-ray equipment

2)
What is the meaning of the word 'plunge' in context of the passage?
        i)Jump
        ii)Dip
        iii)Dive
        iv)Venture

3)
Why did people ridicule Marie?
        i)Because they thought she was taking credit for her husband's wotk
        ii)Because marry of her experiments failed
        iii)Because she never got any credit for her work
        iv)Because they thought that she did not help enough during world war 1

4)
What can be said about Marie Curie?
        i)She liked to work on the front lines of the battlefield
        ii)She did not let what people said oppress her
        iii)She didn't have many friends
        iv)She was inspired to work as a scientist after her marriage

3)
The criteria to select a team of dancers for participating in a dance competition are as follows. The team must

have 5 to 10 dancers in the group;
have all dancers between the age of 11 and 17 years;
submit an original dance recording of a duration of at most 7 minutes;
have all members of the same school;
have one faculty member accompanying them.

However, in case of a team that
fulfills all other conditions except (3) but has participated in the same competition held before, it should be referred to the Manager, Organizing Committee.
fulfills all other conditions except (5) but has a group leader from among the team members, and s/he is between the age of 15 and 17 years, it should be referred to the Secretary, Organizing Committee.

1)
A team consists of 10 dancers of PriceWater International School, Delhi. Five of them are 14 years of age, two of them are 15 years of age and three of them are 16 years of age. They submitted a 7-minute recording of their originally choreographed dance to the panel a few days back. Their dance teacher couldn't accompany them and hence they are accompanied by their arts teacher. Should the team be allowed to participate?

        i)The team must be allowed to participate
        ii)The team must NOT be allowed to participate
        iii)The team must be referred to the Manager, Organizing Committee
        iv)The team must be referred to the Secretary, Organizing Committee
        v)Insufficient data

2)
A team consists of 9 dancers of IPY International School, Delhi. The average age of all the dancers is 15 years. This team had won this dance competition the last year. They have submitted a 5-minute recording of their originally choreographed dance to the panel. The group leader is one amongst these 9 dancers and she is 16 years of age. Should the team be allowed to participate?

        i)The team must be allowed to participate
        ii)The team must NOT be allowed to participate
        iii)The team must be referred to the Manager, Organizing Committee
        iv)The team must be referred to the Secretary, Organizing Committee
        v)Insufficient data

4)
The criteria for allotment of on-campus residential apartments to faculty members of a university are as follows. The faculty member must

        have been a permanent employee of the university for a minimum of three years;
        reside at a distance of 20 miles or more from the university campus;
        be willing to pay a refundable housing deposit of $1,000 before allotment; 4. not be involved in any case related to misconduct inside or outside the university campus.

        However, if the candidate
        fulfils all conditions except (1) but has been a visiting faculty at the university for a minimum of five years, s/he should be referred to the Director, Faculty Housing;
        fulfils all conditions except (2) but resides at a distance of minimum 15 miles and does not own any vehicle, s/he should be waitlisted;

fulfils all conditions except (3) but is willing to pay $500 before the allotment and the remaining within two days of allotment, s/he shoud be referred to the Accounts Head, Faculty Housing.

(The starting date of allotment is July 01, 2018)

1)
Alex teaches English at the university. He was hired as a permanent employee on March 15, 2014. He has not been involved in any case of misconduct, inside or outside the university campus. He resides in the outskirts of the city which is 25 miles away from the university campus. He is willing to pay $500 at the time of allotment and the balance by July 03, 2018. Should the faculty member be allotted an apartment?

i)The faculty member should be allotted an apartment.
ii)The faculty member should be referred to the Accounts Head, Faculty Housing.
iii)The faculty member should be referred to the Director, Faculty Housing.
iv)The faculty member should not be allotted an apartment.
v)Insufficient data

2)
David joined the university as a permanent faculty in the department of history on August 15, 2012. He has an impeccable teaching record and has not been involved in any kind of misconduct inside or outside the university campus. His permanent residence is 22 miles away from the university campus and he travels to the campus every day in his own car. He is willing to pay a refundable housing deposit of $1,000 before allotment. Should the faculty member be allotted an apartment?

i)The faculty member should be allotted an apartment.
ii)The faculty member should be referred to the Accounts Head, Faculty Housing.
iii)The faculty member should be referred to the Director, Faculty Housing.
iv)The faculty member should not be allotted an apartment.
v)Insufficient data

5)
Many people listen to music while they're carrying out a task, whether they're studying for an exam, driving a vehicle or even reading a book. Many of these people argue that background music helps them focus. Why. though? When you think about it, that doesn't make much sense. Why would having two things to concentrate on, make you more focused, not less? Some people even go so far as to say that not having music on, is more distracting. So what's going on there?

Why would music help us concentrate, though? One argument is to do with attention. For all its amazing abilities, the brain hasn't really evolved to take in abstract information or spend prolonged periods thinking about one thing. We seem to have two attention systems: a conscious one that enables us to direct our focus towards things we know we want to concentrate on and an unconscious one that shifts attention towards anything our senses pick up that might be significant. The unconscious one is simpler, more fundamental, and linked to emotional processing rather than higher reasoning. It also operates faster. So when you hear a noise when you're alone at home, you're paying attention to it long before you're able to work out what it might have been. You can't help it.

The trouble is, while our conscious attention is focused on the task in hand, the unconscious attention system doesn't shut down; it's still very much online. scanning for anything important in our peripheral senses. And if what we're doing is unpleasant or dull and were already trying to force our attention to stay fixed on it. the unconscious attention system is even more potent. This means that a distraction doesn't need to be as stimulating to divert our attention on to something else.

Have you ever worked in an open-plan office and been working on a very critical task, only to be driven slowly mad by a co-worker continuously sniffing, or sipping their coffee, or clipping their nails? Something quite innocuous suddenly becomes much more infuriating when you're trying to work on something your brain doesn't necessarily enjoy. Music is a very useful tool in such situations. It provides non-invasive noise and pleasurable feelings, to effectively neutralize the unconscious attention system's ability to distract us. Its much like giving small children a new toy to play with while you're trying to get some work done without them disturbing you.

1)
What is the meaning of the word "innocuous" in context of the passage?
> i)Unconscious
> ii)Irritating
> iii)Harmless
> iv)Small

2)
How does music increase effectiveness while working?
> i)It helps in increasing our attention span
> ii)Having two things to concentrate on, helps people focus more.
> iii)It makes our tasks less boring
> iv)It neutralizes the unconscious attention system's ability to distract us.

3)
Why is it difficult to perform tasks even when your conscious attention is focused?
> i)Because the tasks are mundane.
> ii)Because the conscious attention system doesn't stimulate the brain enough to stay focused.
> iii)Because the conscious attention system simultaneously focusses on peripheral senses.
> iv)Because the unconscious attention system doesn't shut down.

4)
Between which of the two has an analogy been made in the passage?
> i)Children's toys and music
> ii)Music and driving a vehicle
> iii)Music and an employee sipping coffee
> iv)Children's toys and an employee sipping coffee

6)
Isaac Newton is mostly known for his discoveries related to gravity, yet he was also a pioneer in research on light. He identified the seven colors of a rainbow that are created by reflection and refraction, which is the bending of light through clear surfaces. The beam of the white light separates into seven colors as they enter millions of raindrops in the sky.

Light travels at a certain speed, but the colors of light slow down at differentspeeds as they enter the raindrop. Light from the Sun then exits each raindrop and depending on the angle it entered, only a single color exits the raindrop. This takes place with many raindrops simultaneously, and the resulting effect is the different stripes and colors of the rainbow. Psychologist Roland Fleming from the Justus Liebig University Giessen in Germany studies how we perceive objects around us. He says, "What we call color is something that's perceived by the mind. Of course, there's a physical origin of that, which is the

physical spectrum of different wavelengths of light. But our eyes and brains interpret these andcreate our perceptions after a lot of processing."

A rainbow can be viewed only when the sun is behind the person looking at the sky, and the rain is in the front of the person. It will only become visible at an angle of about 40' from the horizon. Sometimes, a second rainbow may be seen directly above the first rainbow, but the colors would be in the reverse order. There have also been rare sightings of a third or fourth rainbow in the sky. The rainbows are not physical objects and cannot be touched.

If two people view a rainbow from different angles or distances. they will see different versions of it. It may be brighter or seem to be fading depending on their location relative to the rainbow. Finally, there are two other kinds of rainbows: moon bows and fog bows. A moon bow is a rare nighttime rainbow produced by the light from the moon. The cloud and fog droplets produce a fogbow. They are very faint and the colors are hardly visible, but they are much larger and wider than a regular rainbow.

1)
What is the psychologist, Ronald Fleming's view on colors?
            i)We distinguish colors as they are interpreted by our minds
            ii)We perceive colors to be of different wavelengths while actually, they are not
            iii)Our eyes and brains interpret colors differently
            iv)There is no physical origin of colors

2)
When there is a second rainbow present above the first, how is it different from the first?
            i)The colors of the second rainbow are partially visible
            ii)The colors of the second rainbow are in the reverse order
            iii)The colors of the rainbow appear brighter
            iv)The second rainbow cannot be viewed from the same angle as the first

3)
In which rainbow(s) is the visibility of colors limited?
            i)A fogbow
            ii)A moon bow
            iii)A rainbow
            iv)Both fogbow and moon bow

4)
According to Newton, how were the colors of the rainbow created?
            i)Through reflection and refraction of light by raindrops
            ii)Through refraction of moon lights by raindrops
            iii)Through refraction of light by fog droplets
            iv)Through reflection of moon lights by clouds

7)
The criteria to contest for the post of president in the student council elections at Prestige High School are as follows. The candidate must
            be a Grade 10 or 11 student;
            have a minimum attendance of 85% in the previous academic session;
            have scored at least a grade of 'B' in the previous academic session and not have failing grades in any of the subjects. Typical grades (from highest to lowest) are A, B, C, D, and F, where F stands for 'Fail'.

have a clear disciplinary record for a minimum of previous three years.

However, if a candidate
fulfils all other conditions except (2) but has a minimum attendance of 75% and has rendered a minimum of 30 hours of community service during the last academic session, s/he should be referred to the Director. Election Commission;
fulfils all other conditions except (4) but has a clear disciplinary record for the last one year and a recommendation from the class teacher, s/he should be waitlisted.
(The elections will be conducted on January 10, 2018)

1)
Tim is a grade 10 student at the Prestige high school. He scored a grade of 'A in his last academic session. He has had a clear disciplinary record throughout his tenure in the school. He missed school for many days due to ill- health during the last academic session and clocked only 78% attendance. He rendered 35 hours of community service after joining back to earn the required credits to pass his class. Should the candidate be allowed to contest for the election?

> i)The candidate should be allowed to contest the election
> ii)The candidate should be referred to the Director, Election Commission
> iii)The candidate should be waitlisted
> iv)The candidate should not be allowed to contest the election
> v)Insufficient data

2)
Lara studies in Grade 11 at the Prestige High School. She is a brilliant student and has never got a failing grade in any of the subjects. She had 96% attendance in the last academic year. She has never been subjected to any disciplinary action by the high school authorities. Should the candidate be allowed to contest for the election?

> i)The candidate should be allowed to contest the election
> ii)The candidate should be referred to the Director, Election Commission
> iii)The candidate should be waitlisted
> iv)The candidate should not be allowed to contest the election
> v)Insufficient data

8)
The conditions for allotment of new flats by the housing authority in Florida are as follows. The applicant must

> submit the declaration of domicile in the State of Florida;
> be employed or self-employed for at least 5 years in the state of Florida:
> be ready to pay the total cost of the flat in a period of 10 years;
> not be less than 30 years of age as of December 31, 2017.

However, in case of an applicant who

> fulfills all other criteria except (1) but has been living in Florida for more than 10 years, s/he should be referred to the Chairman of the housing authority;
> fulfills all other criteria except (3) but is an army veteran or the son/daughter/husband/wife of an army veteran, s/he should be referred to the Vice-Chairman of the housing authority;

fulfills all other criteria except (4) but is more than 27 years of age as of December 31, 2017, s/he should be waitlisted.

1)
Jimmy is an army veteran's son and was born in 1989. He has a declaration of domicile in the state of Florida and can submit the same. He started a consultancy firm in Florida 7 years ago and has a stable income. He can pay the total cost of the flat in 8 years. Should the given applicant be allotted a new flat?

      i)The applicant must be allotted a new flat
      ii)The applicant must be referred to the Chairman, Housing Authority
      iii)The applicant must be referred to the Vice Chairman, Housing Authority
      iv)The applicant must be waitlisted
      v)Insufficient data

2)
Mona was born in Texas on June 5,1973. She has a declaration of domicile in the state of Florida and can submit the same. Her family moved to Arizona and she completed her high school there. She is currently working in the administrative department of a hospital in Florida. She has been working in this hospital for over 6 years. She can pay the total cost of the flat in 5 years. Should the given applicant be allotted a new flat?

      i)The applicant must be allotted a new flat
      ii)The applicant must be referred to the Chairman, Housing Authority
      iii)The applicant must be referred to the Vice Chairman, Housing Authority
      iv)The applicant must be waitlisted
      v)Insufficient data

34. Select the word or phrase which best expresses the meaning of the given word.

      Insidious

      Insightful

      Sinister

      Sincere

      Naïve

35. In a chemical manufacturing unit, six sirens begin going off together and then go off at intervals of 2, 4, 6, 8, 10 and 12 seconds. How many times do they go off together in 30 minutes?

      15 times

      42 times

      16 times

      30 times

36. In how many ways can the letters of the "SCHEDULE" be arranged?

40.320

10,080

20,160

16,560

37. At what rate of interest per annum will an amount of money triple itself in 20 years?

10%

20%

13%

15%

38. Find the annual interest on a sum of Rs.42,000 (payable in year 2) at 6% rate of interest.

Rs.36,960

Rs. 5,040

Rs. 39,480

Rs. 2,520
